

Met Tower Locations:

This file lists "met towers" (meteorological towers) which the KAAA is aware of in Kansas. The data is provided by voluntary submission, and is presumed to be accurate but has not been verified. If you see any errors, please contact the KAAA. Also, if you would like to add towers to this database, please contact us. Thanks.

Edwards County N 38° 2' 32.48" W 99° 24' 15.78" 60 meters high

Comments: The top 1/3rd of the tower is painted alternating orange and white; there is one set of obstruction balls about 10 meters down the guy wires; the anchor points have yellow sleeves for increased visibility. The tower stands approximately 300' east of an existing, lighted AT&T tower.

Seward County N 37° 8' 34.6" W 100° 59' 4.5" 60 meters (198 feet) high

Comments: North-northwest of Liberal, Kansas, approximately 6.4 miles north of Liberal Airport at a heading of 346.8°. The tower has two sets of orange marker balls on the guy wires, and the top 1/3 of the tower is painted orange/white/orange in approximately 4-meter (13-foot) increments.
